Printing Green

There's no reason a printing company can't be green. Here at Huntford Printing & Graphics, we take our responsibility for the earth's future seriously and do everything we can to reduce waste.

We **RECYCLE** everything we can: paper, ink, toner, metal press plates, batteries, cans and bottles, film, and chemicals.

We **REUSE** scrap paper to make notepad cubes for our customers' use. We also donate scrap paper to local schools and use recycled paper whenever possible.

We **CONSERVE** by using ink made from soy (a renewable, environmentally friendly resource) and energy-saving lighting throughout our facility.
